ABOUT ME

Aspiring Data Analyst with experience in data analysis, dashboard development, and transforming complex datasets into actionable insights.

Skilled in SQL, Python, Power BI, and data visualisation, with a strong interest in supporting data-driven decision making through clear analysis and reporting.

KEY STRENGTHS

Team Collaboration & Leadership
Analytical & Problem-Solving Mindset
Communication & Stakeholder Engagement
Adaptability & Initiative
Attention to Detail & Quality Assurance

WORK EXPERIENCE

QX Tech, Canberra
Nov 2025 - Present

Data Engineer Intern

- Analysed company and operational datasets using SQL and Python to improve data quality and support business decision-making.
- Identified and resolved data inconsistencies, duplicates, and missing values across large datasets, improving reporting accuracy.
- Developed data validation processes and quality checks to ensure reliable business information.
- Collaborated with stakeholders to transform raw data into structured datasets for reporting and analysis.
- Supported SEO and web performance analysis by monitoring data trends and identifying optimisation opportunities.

Yinhai Software, China
Nov 2021 - Jan 2022

Operation & Maintenance Engineer Intern

- Performed SQL queries and data analysis to identify user behaviour trends and support business decisions.
- Conducted system and regression testing for mobile applications and WeChat mini-programs.
- Documented defects, test results, and technical findings to improve product quality and cross-team communication.

EDUCATION

Master of Data Science
University of Canberra
July 2025 - Present

Bachelor of Computing
Australian National University
July 2020 - Dec 2024

TECHNICAL SKILLS

Data Analysis	SQL, Python (Pandas, NumPy), R
Statistics & Analytics	Hypothesis Testing, Exploratory Data Analysis, Data Cleaning, Data Validation
Data Visualisation	Dashboard Design, Data Storytelling, KPI Reporting
Business Intelligence	Power BI, Tableau, Excel
Tools & Platforms	Git, Linux, AWS Fundamentals (EC2, S3, VPC)

ACADEMIC & TECHNICAL PROJECTS

Executive Analytics Dashboard | ANU Data Transformation Initiative

Feb 2024 – Nov 2024

- Collaborated with stakeholders to identify reporting needs and define key business metrics.
- Analysed organisational data and developed interactive dashboards using Power BI and Python.
- Translated complex datasets into clear visual insights to support executive decision-making.
- Delivered a user-centred analytics solution that received a Distinction grade.

Business Data Enrichment & Analysis

Feb 2026 -Apr 2026

- Collected, cleaned, and analysed company information from multiple data sources.
- Applied data validation and deduplication techniques to improve dataset quality and consistency.
- Performed exploratory analysis to identify missing information and data quality issues.
- Produced structured datasets supporting business reporting and downstream analytics.
- Processed and enriched over 30,000 company records using Python and SQL.

Pet Image Classification System | Computer Vision

Mar 2026

- Built an image classification pipeline using PyTorch, fine-tuning a pre-trained ResNet18 model for binary classification
 - Applied data preprocessing and augmentation techniques (e.g., normalization, transformations) to improve model generalisation
 - Evaluated model performance using validation metrics and confusion matrix, achieving ~94% accuracy on unseen data
-

VOLUNTEER WORK

COVID-19 Community Volunteer | Xinjiang, China

Apr 2020 – May 2020

- Maintained and updated community health records, ensuring accurate tracking of quarantine and movement information.
 - Used Excel to organise, clean, and monitor large volumes of community data for daily reporting purposes.
 - Supported data verification and record management processes, improving the accuracy and reliability of health monitoring information.
 - Assisted community staff in preparing timely reports to support local COVID-19 response efforts.
